- RMI
- MVVM

*DP = Design Pattern

📄 Professional Profile

Becoming **Full-Stack Developer**, that is the journey I am currently on. I don't know where or how long it will take, but I will grow my knowledge and experience until then.

Those sentences alone can already tell you what kind of person I am. **Ambitious, Structured, Result-oriented, and Quick-witted**; words that more or less describe my personality. I am not just sitting still, waiting for the right opportunity.

🎓 Education

Bachelor's degree, Software Technology Engineering, VIA University College, Horsens

August 2022 - January 2026

Extending my knowledge by learning **JAVA, HTML, CSS, Bootstrap, JavaScript** and **jQuery** ended up with first semester Board Games Association System and grade **12**.

AP degree, Computer Science, Zealand Academy, Roskilde

August 2021 - July 2022

The first year of this programme, with an average grade of **12**, gave me an introduction to the world of Software. Learning basics in **SDLC** and **C#** programming language were key parts of the curriculum.

👥 Professional Projects

Paddle Nation, BeCreative

February 2023 - In the process

As a part of a group created by students of VIA, I am working as a **Full-Stack Developer** with a focus on the **front end**. Paddle Nation is in the developing stage with the vision of creating a system with renting and payment methods. **C#, React**, and **Rest API**, the leading technologies used for the system functionality.

Personal Projects

Portfolio, Self-development

March 2023 – April 2023

I have decided to create my portfolio to improve my **web development** skills. Consisting of some of my most significant projects. I wanted to present the hard work generated in my free time. Technologies such as **HTML**, **CSS** and **ReactJS** were used to build this website.

GPT-3 Recreation, Self-development

February 2023 – February 2023

Following **Figma** design to create a fully responsive **React** Web Application was a great way to better understand **ReactJS**. You can visit the website at jakubcerovsky-gpt3.com or view the code at my **GitHub** profile.

Zealand Marketplace, Zealand Academy, 2nd semester

March 2022 – June 2022

Blazor Web Application with **C#** and **Azure Database**, working as a second-hand marketplace. Other technologies used were **Entity Framework Code First Approach** and **MySQL**. Users can log in or register themselves, add items and create reviews. No payment methods were implemented.

Job Experience

Pynten Restaurant, Dish Washer, Horsens

September 2022 - Currently working in

La Rustica Restaurant, Waiter, Roskilde

November 2021 - August 2022

As a bartender and later waiter, I was **responsible** for the satisfaction of customers. Ordering meals, closing the cash register and **managing** people shifts in **Danish** speaking environment were great experiences.

Remarc Sunseafun, Entertainer, Kos Island

June 2020 - October 2020

I started as a sports entertainer and worked up to a **team-leader assistant**. It had a significant impact on my **English** skills and **communication** in general. Taught me the way how to work in a **team** with my responsibilities.

Personal Details

I am **20** years old, born in the **Czech Republic**. I live in **Horsens** with my girlfriend, whom I met in Denmark. We want to stay in Denmark after our studies, so I am trying to learn **Danish** in my free time.

As an extracurricular activity, I am part of **VIA Aviators**; as a group of students from different programmes, we are building our **drones**.

I **work-out** almost every day for the past two years, and you can say that it has become a part of me. In the Spring, I will try to find a place where I can play **football** to revive my past passion.
